

Dr Sonia BRUN, PhD

Dr Sonia BRUN has a chemical engineering bachelor and a PhD in Virology. She has worked in Human Immunodeficiency Virus (HIV) research during 5 years and particularly on the non-human primate models of HIV at the Institute of Emerging Diseases and Innovative Therapies within the French Alternative Energies and Atomic Energy Commission (CEA).

In 2012, she joined Genoscience Pharma as Head of biology laboratory in charge of *in vitro* studies. She is involved in the discovery of two new families of small molecules effective against cancer stem cells.
