

Dr Jerome Cros, MD, PhD

Dr Jerome Cros is an Associate Professor in the Dpt of Pathology of Beaujon University Hospital, an ENETS center of excellence and the largest French pancreatic surgical center. He obtained his MD from Necker medical school, Paris and his PhD from Mount Sinai Hospital, New York.

He is now specialized in pancreatic pathology and focuses his research on the role of aging on pancreatic adenocarcinoma and the molecular anomalies driving neuroendocrine tumors. He is also very interested in the development of new *in situ* techniques and living models together with predictive biomarkers discovery.
